REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest a combination of an outer crucible comprising an electrically insulating material and the inner crucible comprises an electrically conductive material heatable by an electromagnetic field. Likewise, the prior art does not teach or fairly suggest a combination of an outer crucible having a closed jacket made from an electrically conductive material, to which an MF/HF coil is associated for heating and said inner crucible is a double-walled crucible that is connectable to a current source so that a current may be passed through said double-walled crucible for heating. It would not have been obvious to modify the prior art apparatus as such since the operation of the prior art arrangements would have been dramatically changed.
2. Arguments with regard to claim 1 and its dependents were found convincing. That is, the nozzle structure was not adequately disclosed or obvious from Aulich et al. Furthermore, the functional limitations added to claim 1 require a certain structure, some of which is embodied in the nozzle structure claimed. The prior art apparatus was not capable of performing the claimed function.
3. The amendments submitted contain no new matter. The applicant has pointed out the location of the literal support within the originally filed disclosure for each of the limitations added to the claims.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
